2021 (n=24 as of 2 May 2021)

1. Cancer Cachexia in Adult Patients: ESMO Clinical Practice Guidelines
   J. Arends, F. Strasser, S. Gonella, T. S. Solheim, C. Madeddu, P. Ravasco, L. Buonaccorso, M. A. E. de van der Schueren, C. Baldwin, M. Chasen & C. I. Ripamonti on behalf of the ESMO Guidelines Committee
   ESMO Open (2021)
   Note: Approved by the ESMO Guidelines Committee: February 2021. This is an open access article under the CC BY-NC-ND license (http://creativecommons.org/licenses/by-nc-nd/4.0/).

2. The Clinical Value of Nutritional Care before and during Active Cancer Treatment.

3. NONINVASIVE BREATH TESTS FOR DIAGNOSIS OF SIBO AND LACTOSE INTOLERANCE IN PATIENTS ON CHEMOTHERAPY TREATMENT FOR COLORECTAL AND GASTRIC CANCER.
   Gonçalves AR, Ambrogini O Jr, Forones NM.

4. Impact of malnutrition diagnosed using GLIM criteria on clinical outcomes of patients with gastric cancer.
   Xu LB, Shi MM, Huang ZX, Zhang WT, Zhang HH, Chen XD, Shen X.

5. Malnutrition and the Survival of Cervical Cancer Patients: A Prospective Cohort Study Using the PG-SGA Tool.
   Argefa TG, Roets L.

   Pham Van B, Nguyen Thi Thanh H, Le Thi H, Nguyen Le Tuan A, Dang Thi Thu H, Dang Viet D.

8. Malnourished lung cancer patients have poor baseline functional capacity but show greatest improvements with multimodal prehabilitation.
8. An observational study on nutrition status in gastric cancer patients receiving ramucirumab plus taxane: BALAST study.

9. Role of Muscle Mass and Nutritional Assessment Tools in Evaluating the Nutritional Status of Patients With Locally Advanced Nasopharyngeal Carcinoma.

10. Malnutrition score and Body Mass Index as nutritional screening tools for hemodialysis patients.

Rios TC, de Oliveira LPM, da Costa MLV, da Silva Baqueiro Boulhosa RS, Roriz AKC, Ramos LB, Bueno AA.

12. Lifestyle and Dietary Factors Associated with Inflammatory Bowel Disease among Jordanian Patients.
Qualiqiy TR, Rayyan YM, Tayyem RF.

15. Association of adductor pollicis muscle thickness and handgrip strength with nutritional status in hospitalized individuals.
Yoshimura da Costa T, Yukari Suganuma J, Faria S, Bernardes Spexoto MC.

16. Low skeletal muscle radiodensity is the best predictor for short-term major surgical complications in gastrointestinal surgical cancer: A cohort study.
Carvalho ALM, Gonzalez MC, Sousa IM, das Virgens IPA, Medeiros GOC, Oliveira MN, Dantas JCAS, Trussardi Fayh AP.

17. Influence of nutritional status and frailty phenotype on health-related quality of life of patients with bladder or kidney cancer.
Dos Reis PF, de França PS, Dos Santos MP, Martucci RB.

18. Malnutrition screening on hospital admission: impact of overweight and obesity on comparative performance of MUST and PG-SGA SF.
van Vliet IMY, Gomes-Neto AW, de Jong MFC, Bakker SJL, Jager-Wittenaar H, Navis GJ.

19. Home enteral nutrition for postoperative elderly patients with esophageal cancer.
Chen X, Zhao G, Zhu L.

2020

   Von Geldern P, Salas C, Alvayay P, Silva C, de la Maza MP.

10. Baseline nutritional status could be a predictor for radiation esophagitis in esophageal cancer patients undergoing radiotherapy.
    Ann Transl Med. 2020 Sep;8(18):1148. doi: 10.21037/atm-20-4078

11. Malnutrition Prevalence according to the GLIM Criteria in Head and Neck Cancer Patients Undergoing Cancer Treatment.
    Steer B, Loeliger J, Edbrooke L, Deftereos I, Laing E, Kiss N.

12. Nutritional Status, Functional Status, and Quality of Life - What is the Impact and Relationship on Cancer Patients?
    Santos IM, Mendes L, Carolino E, Santos CA.

13. Best Evidence to Best Practice: Implementing an Innovative Model of Nutrition Care for Patients with Head and Neck Cancer Improves Outcomes.

15. Using Global Criteria to Detect Malnutrition: Application in Disease States.
    Kirsch R, Matthews K, Williams V.

16. Relationship between nutritional status on admission to the intensive care unit and clinical outcomes.

17. Applicability of the Nutrition Risk Screening 2002 Combined with a Patient-Generated Subjective Global Assessment in Patients with Nasopharyngeal Carcinoma.

18. SARC-CalF assessed risk of sarcopenia and associated factors in cancer patients.
    Souza VF, Ribeiro TSC, Marques RA, Petarli GB, Pereira TSDS, Rocha JLM, Guandalini VR.

    Xu YC, Vincent JL.

20. Hand grip strength as predictor of undernutrition in hospitalized patients with cancer and a proposal of cut-off.
    Mendes NP, Barros TA, Faria BS, Aguiar ES, Oliveira CA, Souza ECG, Pereira SS, Rosa COB.

    de Oliveira LC, Abreu GT, Lima LC, Aredes MA, Wiegert EVM.

    Hsueh SW, Liu KH, Hung CY, Tsai CY, Hsu JT, Tsang NM, Hsueh WH, Yang C, Chou WC.

23. High prevalence of malnutrition both on hospital admission and predischarge.
    van Vliet IMY, Gomes-Neto AW, de Jong MFC, Jager-Wittenaar H, Navis GJ.

24. The patient-generated subjective global assessment is a promising screening tool for cancer cachexia.
25. **Effect of Oral Nutritional Supplements on Patients with Esophageal Cancer During Radiotherapy.**

26. **Nutritional status and survival of 8247 cancer patients with or without diabetes mellitus-results from a prospective cohort study.**

27. **Prevention of underfeeding during enteral nutrition after gastrectomy in adult patients with gastric cancer: an evidence utilization project.**

28. **Nutritional assessment and risk factors associated to malnutrition in patients with esophageal cancer.**

29. **Nutritional Status and Quality of Life in Hospitalised Cancer Patients Who Develop Intestinal Failure and Require Parenteral Nutrition: An Observational Study.**

31. **Serum Concentrations of Carotenoids and Fat-Soluble Vitamins in Relation to Nutritional Status of Patients with Ovarian Cancer.**

32. **Linguistic and content validation of the translated and culturally adapted PG-SGA, as perceived by Norwegian cancer patients and healthcare professionals.**

33. **Nutritional status and its effect on complications in patients with colorectal cancer.**

34. **Coexistence of malnutrition, frailty, physical frailty and disability in patients with COPD starting a pulmonary rehabilitation program.**

35. **Malnutrition Screening and Assessment in the Cancer Care Ambulatory Setting: Mortality Predictability and Validity of the Patient-Generated Subjective Global Assessment Short Form (PG-SGA SF) and the GLIM Criteria.**

53. **Symptom Burden in Patients With Home Care Who Are at Risk for Malnutrition: A Cross-Sectional Study.**
Berggren E, Strang P, Orrvall Y, Odlund Olin A, Törnkvist L.

54. **Vascular Surgery Patients at Risk for Malnutrition Are at an Increased Risk of Developing Postoperative Complications.**
Banning LBD, Ter Beek L, El Moumni M, Visser L, Zeebregts CJ, Jager-Wittenaar H, Pol RA.

55. **Self-Completion of the Patient-Generated Subjective Global Assessment Short Form Is Feasible and Is Associated With Increased Awareness on Malnutrition Risk in Patients With Head and Neck Cancer.**
Jager-Wittenaar H, de Bats HF, Welink-Lamberts BJ, Gort-van Dijk D, van der Laan BFAM, Ottery FD, Roedenburg JL.

56. **Intradialytic parenteral nutrition improves nutritional status in a complex cystic fibrosis patient with redo double lung transplant and end-stage renal disease.**
Melville T, Vardy K, Milliner L, Angus R.

57. **Rationale and design of a randomised controlled trial investigating the effect of multidisciplinary nutritional rehabilitation for patients treated for head and neck cancer (the NUTRI-HAB trial).**
Kristensen MB, Wessel I, Beck AM, Dieperink KB, Mikkelsen TB, Møller JK, Zwisler AD.

58. **Nutrition risk and assessment process in patients with bladder cancer undergoing radical cystectomy.**
Michel C, Robertson HL, Camargo J, Hamilton-Reeves JM.

59. **Nutrition Status and Health Related Quality of Life Among Outpatients With Advanced Head and Neck Cancer.**

60. **Assessing nutritional status in a cohort of liver cirrhosis outpatients: A prospective cross-sectional study.**
Luong R, Kim M, Lee A, Carey S.

61. **Selection and optimization of nutritional risk screening tools for esophageal cancer patients in China.**

62. **Cancer-Associated Malnutrition and CT-Defined Sarcopenia and Myosteatosis Are Endemic in Overweight and Obese Patients.**
Martin L, Gioulbasanis I, Senesse P, Baracos VE.

63. **Is preoperative sarcopenia a good predictor of postoperative complications and outcomes after pelvic exenteration surgery?**

64. **Effects of early nutritional intervention on oral mucositis in patients with radiotherapy for head and neck cancer.**
QJM. 2020 Jan 1;113(1):37-42. doi: 10.1093/qjmed/hcz222.PMID: 31432089

65. **High prevalence of malnutrition and nutrition impact symptoms in older patients with cancer: Results of a Brazilian multicenter study.**
de Pinho NB, Martucci RB, Rodrigues LD, D’Almeida CA, Thuler LCS, Saunders C, Jager-Wittenaar H, Peres WAF.

66. **Patient-generated subjective global assessment versus nutritional risk screening 2002 for gastric cancer in Chinese patients.**

67. **Survey and analysis of the nutritional status in hospitalized patients with malignant gastric tumors and its influence on the quality of life.**

Lin T, Yang J, Hong X, Yang Z, Ge T, Wang M.

69. Cancer-Related Fatigue, Laboratory Markers as Indicators for Nutritional Status among Patients with Colorectal Cancer.
Sharour LA.

70. Serum IGFBP2 Level is a New Candidate Biomarker of Severe Malnutrition in Advanced Lung Cancer.

71. Association between Scored Patient-Generated Subjective Global Assessment and Skeletal Muscle Determined by Computed Tomography in Patients with Cervical Cancer.
de Oliveira Pereira F, Pereira Mota A, Azevedo Aredes M, Villaça Chaves G, Ramos Cardoso IC.

Bicakli DH, Uslu R, Güney SC, Coker A.

73. Pre and Postoperative Muscle Wastage and Sarcopenia Using CT Scans in Patients Undergoing Pelvic Exenteration Surgery
Surg Case Reports 2020 DOI: 10.31487/j.JSCR.2020.04.10

2019

1. Diet quality is associated with malnutrition and low calf circumference in Canadian long-term care residents.
Carrier N, Villalon L, Lengyel C, Slaughter SE, Duizer L, Morrison-Koechl J, Keller H.

3. Comparative Analysis Between Computed Tomography and Surrogate Methods to Detect Low Muscle Mass Among Colorectal Cancer Patients.
Souza NC, Gonzalez MC, Martucci RB, Rodrigues VD, de Pinho NB, Qureshi AR, Avesani CM.

5. Prevalence of Malnutrition or Risk in Residents in Long Term Care: Comparison of Four Tools.
Keller H, Vucea V, Slaughter SE, Jager-Wittenaar H, Lengyel C, Ottery FD, Carrier N.

Oh SY, Koh SJ, Baek YJ, Kwon KA, Jeung HC, Lee KH, Won YW, Lee HJ.

7. An evaluation of the validity of nutrition screening and assessment tools in patients admitted to a vascular surgery unit.
Thomas J, Kaambwa B, Delaney C, Miller M.

9. Malnutrition associated with an increased risk of postoperative complications following hepatectomy in patients with hepatocellular carcinoma.
Erickson N, Storck LJ, Kolm A, Norman K, Fey T, Schiffler V, Ottery FD, Jager-Wittenaar H.

11. Nutritional diagnosis of patients with hepatocellular carcinoma: what is the best method?
Silva DMD, Henz AC, Fernandes SA, Marroni CA.

Balstad TR, Bye A, Jønssen CR, Solheim TS, Thoresen L, Sand K.

13. ADIPONECTIN, VITAMIN D AND NUTRITIONAL STATUS IN PATIENTS WITH ADVANCED COLORECTAL CANCER OR DURING FOLLOW-UP.
Cavagnari MAV, Vidigal VM, Silva TD, Barão K, Forones NM.

Valente KP, Almeida BL, Lazzarini TR, Souza VF, Ribeiro TSC, Guedes de Moraes RA, Pereira TSS, Guandalini VR.

15. Eating-related distress in advanced cancer patients with cachexia and family members: a survey in palliative and supportive care settings.
Amano K, Morita T, Koshimoto S, Uno T, Katayama H, Tataran R.

16. Malnutrition in Older Adults with Cancer.
Zhang X, Edwards BJ.

Starr KP, Young K, Loyack N, Lagoo-Deenadayalan S, Heffin M, Pieper C, Bales C.

18. Effect of Whole-course Nutrition Management on Patients with Esophageal Cancer Undergoing Concurrent Chemoradiotherapy: A Randomized Controlled Trial (P05-031-19).
Qiu Y, You J, Lv Q, Yuan L.

19. The Prevalence of Malnutrition in Patients Suffering from Different Cancers by Three Classification Methods (P05-041-19).
Zhao W, Shi HP.

20. Nutritional diagnosis of patients with hepatocellular carcinoma: what is the best method?
Miranda da Silva D, Henz AC, Fernandes SA, Marroni CA.

21. [Correlation between nutritional status before radiotherapy and dietary intake in patients with oral cancers],
Zhang HF, Zhang MF, Zhao AD, Li RR.

Cavalcante Martins FF, de Pinho NB, de Carvalho Padilha P, Martucci RB, Rodrigues WD, Sales RC, Ferreira Peres WA.

23. Malnutrition associated with nutrition impact symptoms and localization of the disease: Results of a multicentric research on oncological nutrition.
de Pinho NB, Martucci RB, Rodrigues WD, D’Almeida CA, Thuler LCS, Saunders C, Jager-Wittenaar H, Peres WA.

40. Nutritional status of patients admitted to a metropolitan tertiary care vascular surgery unit.

42. Association Between Serum C-Reactive Protein Concentration and Nutritional Status of Malignant Tumor Patients.

43. Food intake by Patient-Generated Subjective Global Assessment (PG-SGA) corresponds to energy and protein intake as well as weight change in patients with advanced cancer.
https://www.clinicalnutritionexperimental.com/article/S2352-9393(18)30097-6/fulltext

44. Body Composition, Serum Biomarkers of Inflammation and Quality of Life in Clinically Stable Women with Estrogen Receptor Positive Metastatic Breast Cancer.

2018

2. Longitudinal Body Composition Changes and the Importance of Fat-Free Mass Index in Locally Advanced Nasopharyngeal Carcinoma Patients Undergoing Concurrent Chemoradiotherapy.

3. A systematic review and meta-analysis of the criterion validity of nutrition assessment tools for diagnosing protein-energy malnutrition in the older community setting (the MACRo study).

5. The Relationship Between Nutritional Risks and Cancer-Related Fatigue in Patients With Colorectal Cancer Fast-Track Surgery.
Wei JN, Li SX. Cancer Nurs. 2018 Nov-Dec;41(6):E41-E47. doi: 10.1097/NCC.0000000000000541.PMID: 29049040

7. Use of hand grip strength in nutrition risk screening of older patients admitted to general surgical wards.

8. Assessing the feasibility of a mobile health-supported clinical decision support system for nutritional triage in oncology outpatients using Arden Syntax.

10. Agreement between Graz Malnutrition Screening (GMS) with subjective nutritional assessment instruments in hospitalized patients.

11. Agreement between PG-SGA category and fat-free mass in colorectal cancer patients.

12. Different nutritional assessment tools as predictors of postoperative complications in patients undergoing colorectal cancer resection.

13. Eating As Treatment (EAT): a stepped-wedge, randomised controlled trial of a health behaviour change intervention provided by dietitians to improve nutrition in patients with head and neck cancer undergoing radiotherapy (TROG 12.03).

14. Evaluating the Nutritional Status of Oncology Patients and Its Association with Quality of Life.

15. Risk for malnutrition in patients prior to vascular surgery.

17. Investigating adherence to Australian nutritional care guidelines in patients with head and neck cancer.

18. Relationship of nutritional status and inflammation with survival in patients with advanced cancer in palliative care.

19. Resting energy expenditure and body composition in patients with head and neck cancer: An observational study leading to a new predictive equation.

22. [Improvement of the nutritional status and quality of life of cancer patients through a protocol of evaluation and nutritional intervention].

23. Development and Validation of a Multidisciplinary Mobile Care System for Patients With Advanced Gastrointestinal Cancer: Interventional Observation Study.

24. Evaluating Photographs as a Replacement for the In-Person Physical Examination of the Scored Patient-Generated Subjective Global Assessment in Elderly Hospital Patients.
Miller M, Thomas J, Suen J, Ong S, Sharma Y.

39. Inflammatory and nutritional statuses of patients submitted to resection of gastrointestinal tumors.
Fruchtenicht AVG, Pozionmyck AK, Reis AMD, Galia CR, Kabke GB, Moreira LF.

40. Home enteral nutrition after minimally invasive esophagectomy can improve quality of life and reduce the risk of malnutrition.

2017
1. Nutrition and Muscle in Cirrhosis.
Anand AC.

2. Diet quality in patients with end-stage kidney disease undergoing dialysis.
Roach LA, Lambert K, Holt JL, Meyer BJ.

3. Malnutrition and its association with readmission and death within 7 days and 8-180 days postdischarge in older patients: a prospective observational study.

4. Applicability of the direct parameters of bioelectrical impedance in assessing nutritional status and surgical complications of women with gynecological cancer.
Cardoso ICR, Aredes MA, Chaves GV.

5. Patient-Generated Subjective Global Assessment of nutritional status in pediatric patients with recent cancer diagnosis.
Vázquez de la Torre MJ, Stein K, Vásquez Garibay EM, Kumazawa Ichikawa MR, Troyo Sanromán R, Salcedo Flores AG, Sánchez Zubieta FA.

6. Investigation of the benefits of early malnutrition screening with telehealth follow up in elderly acute medical admissions.
Sharma Y, Thompson CH, Kaambwa B, Shahi R, Hakendorf P, Miller M.

Wiegert EVM, Padilha PC, Peres WAF.

8. Effect of Hospital to Home nutrition management model on postoperative clinical outcomes of patients with laryngeal carcinoma.
Song G, Liu H.

Barao K, Abe Vicente Cavagnari M, Silva Fucuta P, Manoukian Forones N.

El-Ghammaz AMS, Ben Matoug R, Elzimaita M, Mostafa N.

11. ESPEN diagnostic criteria for malnutrition - A validation study in hospitalized patients.
Guerra RS, Fonseca I, Sousa AS, Jesus A, Pichel F, Amaral TF.

13. Pre-Treatment Nutritional Status and Radiotherapy Outcome in Patients with Locally Advanced Head and Neck Cancers.

15. Relationship between patient-generated subjective global assessment and survival in patients in palliative care.

18. Cachexia at diagnosis is associated with poor survival in head and neck cancer patients.

22. Subjective and objective taste and smell changes in cancer.

24. A Prospective Randomized Controlled Trial to Study the Impact of a Nutrition-Sensitive Intervention on Adult Women With Cancer Cachexia Undergoing Palliative Care in India.

27. Handgrip Dynamometry and Patient-Generated Subjective Global Assessment in Patients with Nonresectable Lung Cancer.

29. **Malnutrition in Acutely Unwell Hospitalized Elderly - "The Skeletons Are Still Rattling in the Hospital Closet".**

   Sharma Y, Thompson C, Shari R, Hakendorp P, Miller M.

   J Nutr Health Aging. 2017;21(10):1210-1215. doi: 10.1007/s12603-017-0903-6. PMID: 29188881

30. **Validity of the Malnutrition Universal Screening Tool (MUST) in Australian hospitalized acutely unwell elderly patients.**

   Sharma Y, Thompson C, Kaambwa B, Shahi R, Miller M.

### 2016

1. **Dietary Counseling Outcomes in Locally Advanced Unresectable or Metastatic Cancer Patients Undergoing Chemotherapy.**

   Sukaraphat N, Chewaskulyong B, Buranapin S.

2. **Efficacy of pancreatic exocrine replacement therapy for patients with unresectable pancreatic cancer in a randomized trial.**

3. **Association of nutritional status-related indices and chemotherapy-induced adverse events in gastric cancer patients.**

4. **Malnutrition: laboratory markers vs nutritional assessment.**

5. **Patient-Generated Subjective Global Assessment Short Form (PG-SGA SF) is a valid screening tool in chemotherapy outpatients.**

   Shalwani SM, Simmonds MJ, Kasyrjanova G, Spahija J.

7. **Content validity across methods of malnutrition assessment in patients with cancer is limited.**

8. **Reliability of nutritional assessment in patients with gastrointestinal tumors.**

   Pozioymyck AK, Fruchtenicht AV, Kabke GB, Volkweis BS, Antoniazzi JL, Moreira LF.

9. **Associations between body composition and nutritional assessments and biochemical markers in patients with chronic radiation enteritis: a case-control study.**

   Cai Z, Cai D, Yao D, Chen Y, Wang J, Li Y.

10. **Malnutrition in Geriatric Rehabilitation: Prevalence, Patient Outcomes, and Criterion Validity of the Scored Patient-Generated Subjective Global Assessment and the Mini Nutritional Assessment.**

    Marshall S, Young A, Bauer J, Isenring E.

    Talwar B, Donnelly R, Skelly R, Donaldson M.J

    Laryngol Otol. 2016 May;130(S2):S32-S40. PMID: 27841109

12. **A Prognostic Model Using Inflammation- and Nutrition-Based Scores in Patients With Metastatic Gastric Adenocarcinoma Treated With Chemotherapy.**

13. **Comparative analysis of undernutrition screening and diagnostic tools as predictors of hospitalisation costs.**

15. Effects of Immunonutrition for Cystectomy on Immune Response and Infection Rates: A Pilot Randomized Controlled Clinical Trial.

16. Effects of intensive nutrition education on nutritional status and quality of life among postgastrectomy patients.

17. Utilization of a Scored Patient-Generated Subjective Global Assessment in Detecting a Malnourished Status in Gynecologic Cancer Patients.

18. Prealbumin/CRP Based Prognostic Score, a New Tool for Predicting Metastasis in Patients with Inoperable Gastric Cancer.

19. Malnutrition: The Importance of Identification, Documentation, and Coding in the Acute Care Setting.

20. Utilization of a Scored Patient-Generated Subjective Global Assessment in Detecting a Malnourished Status in Gynecologic Cancer Patients.

2015

1. Factors associated with malnutrition in hospitalized cancer patients: a cross-sectional study.

2. Preoperative Nutritional Assessment in Elderly Cancer Patients Undergoing Elective Surgery: MNA or PG-SGA?

4. CUTOFF POINT OF THE PHASE ANGLE IN PRE-RADIOTHERAPY CANCER PATIENTS.

5. Patient Generated Subjective Global Assessment as a prognosis tool in women with gynecologic cancer.

6. [DIETARY INTAKE AND NUTRITIONAL STATUS IN ONCOLOGY PATIENTS WHO START TREATMENT WITH TYROSINE KINASE INHIBITORS].

8. MALNUTRITION IN PATIENTS WITH GASTROINTESTINAL CANCER: EFFECTIVENESS OF DIFFERENT DIAGNOSTIC METHODS.
Dias do Prado C, Alves Duarte Bonini Campos J.
9. **Comparison of Quality of Life and Nutritional Status in Gastric Cancer Patients Undergoing Gastrectomies.**
Lim HS, Cho GS, Park YH, Kim SK.

10. **Eating As Treatment (EAT) study protocol: a stepped-wedge, randomised controlled trial of a health behaviour change intervention provided by dietitians to improve nutrition in patients with head and neck cancer undergoing radiotherapy.**

11. **Prevalence of malnutrition in not critically ill older inpatients.**

12. **Usefulness of six diagnostic and screening measures for undernutrition in predicting length of hospital stay: a comparative analysis.**
Guerra RS, Fonseca I, Pichel F, Restivo MT, Amaral TF.

13. **Prevalence of malnutrition in not critically ill older inpatients.**

14. **NRS-2002 for pre-treatment nutritional risk screening and nutritional status assessment in head and neck cancer patients.**

15. **Nutrition adequacy in enhanced recovery after surgery: a single academic center experience.**
Gillis C, Nguyen TH, Liberman AS, Carli F.

16. **Diagnostic test accuracy of nutritional tools used to identify undernutrition in patients with colorectal cancer: a systematic review.**
Håkonsen SJ, Pedersen PU, Bath-Hextall F, Kirkpatrick P.

17. **Evolution of nutritional status in patients with autologous and allogeneic hematopoietic stem cell transplant.**
Barritta de Defranchi RL, Bordalejo A, Cahueto I, Villar A, Navarro E.

18. **Health professionals' attitudes toward the detection and management of cancer-related anorexia-cachexia syndrome, and a proposal for standardized assessment.**
Del Fabbro E, Jatoi A, Davis M, Fearon K, di Tomasso J, Vigano A.

19. **Patient-Generated Subjective Global Assessment in relation to site, stage of the illness, reason for hospital admission, and mortality in patients with gynecological tumors.**
Rodrigues CS, Chaves GV.

20. **Handgrip strength and associated factors in hospitalized patients.**
Guerra RS, Fonseca I, Pichel F, Restivo MT, Amaral TF.

21. **Handgrip strength measurement as a predictor of hospitalization costs.**
Guerra RS, Amaral TF, Sousa AS, Pichel F, Restivo MT, Ferreira S, Fonseca I.

Tan CS, Read JA, Phan VH, Beale PJ, Peat JK, Clarke SJ.

23. **Patient-generated subjective global assessment and classic anthropometry: comparison between the methods in detection of malnutrition among elderly with cancer.**
Araújo dos Santos C, de Oliveira Barbosa Rosa C, Queiroz Ribeiro A, Lanes Ribeiro Rde C. 

24. Comparison of a novel, simple nutrition screening tool for adult oncology inpatients and the Malnutrition Screening Tool (MST) against the Patient-Generated Subjective Global Assessment (PG-SGA).
Shaw C, Fleuret C, Pickard JM, Mohammed K, Black G, Wedlake L.

Sharma D, Kannan R, Tapkire R, Nath S.

2014

1. [Prevalence of malnutrition in not critically ill inpatients].

2. Handgrip strength cutoff values for undernutrition screening at hospital admission.
Guerra RS, Fonseca I, Pichel F, Restivo MT, Amaral TF.

Kiss N, Isenring E, Gough K, Krishnasamy M.

4. Improved nutritional status is related to improved quality of life in Parkinson's disease.
Sheard JM, Ash S, Mellick GD, Silburn PA, Kerr GK.

Cunha Cde M, Sampaio Ede J, Varjão ML, Factum CS, Ramos LB, Barreto-Medeiros JM.

6. Optimizing a frail elderly patient for radical cystectomy with a prehabilitation program.
Carli F, Awasthi R, Gillis C, Kassouf W.

Nho JH, Kim SR, Kwon YS.

8. Intensive nutritional counseling improves PG-SGA scores and nutritional symptoms during and after radiotherapy in Korean cancer patients.
Um MH, Choi MY, Lee SM, Lee JJ, Lee CG, Park YK.

9. [Nutritional assessment and quality of life of oncology outpatients initiating treatment with tyrosine-kinase inhibitors].

10. Malnutrition in patients with chronic GVHD.

11. Characteristics of taste and smell alterations reported by patients after starting treatment for lung cancer.

13. Nutrition outcomes following implementation of validated swallowing and nutrition guidelines for patients with head and neck cancer.
Brown T, Ross L, Jones L, Hughes B, Banks M.

14. A novel automated nutrition screening system as a predictor of nutritional risk in an oncology day treatment unit (ODTU).

16. The influence of nutritional status and disease on adiponectin and TNF-α; levels in colorectal cancer patients.
Abe Vicente M, Donizetti Silva T, Barão K, Vitor Felipe A, Oyama Missae L, Manoukian Forones N.

17. Protocol for a randomized controlled trial of early prophylactic feeding via gastrostomy versus standard care in high risk patients with head and neck cancer.

18. The abridged patient-generated subjective global assessment is a useful tool for early detection and characterization of cancer cachexia.
Vigano AL, di Tomasso J, Kilgour RD, Trutchnigg B, Lucar E, Morais JA, Borod M.

Barthelemy N, Streel S, Donneau AF, Coucke P, Albert A, Guillaume M.

20. Nutritional status and related factors of patients with advanced gastrointestinal cancer.
Zhang L, Lu Y, Fang Y.

Solheim TS, Blum D, Fayers PM, Hjermstad MJ, Stene GB, Strasser F, Kaasa S.

22. Nutritional status assessed by scored patient-generated subjective global assessment associated with length of hospital stay in adult patients receiving an appendectomy.
Huang TH, Chi CC, Liu CH, Chang CC, Kuo LM, Hsieh CC.

Correia Pereira MA, Santos CA, Almeida Brito J, Fonseca J.

24. The use of hand grip strength as a predictor of nutrition status in hospital patients.
Flood A, Chung A, Parker H, Kearns V, O'Sullivan TA.

25. Assessment of nutritional status of gynecological cancer cases in India and comparison of subjective and objective nutrition assessment parameters.
1. Implementation of the Nutrition Care Process and International Dietetics and Nutrition Terminology in a single-center hemodialysis unit: comparing paper vs electronic records.
   Rossi M, Campbell KL, Ferguson M.

2. Early enteral nutrition after total gastrectomy for gastric cancer.

2013

   Todd A, Carroll R, Gallagher M, Meade A.

   Ma L, Poulin P, Feldstain A, Chasen MR.

3. Outcomes of a culturally responsive health promotion program for elderly Korean survivors of gastrointestinal cancers: a randomized controlled trial.

4. Perioperative nutritional status changes in gastrointestinal cancer patients.

5. Validation of nutritional risk index method against patient-generated subjective global assessment in screening malnutrition in colorectal cancer patients.
   Faramarzi E, Mahdavi R, Mohammad-Zadeh M, Nasirimotlagh B.

   Cetinkaya T, Tulek Z.

   Malhi Z, Kandiah M, Chan YM, Hosseinzadeh M, Sohanaki Azad M, Zarfiz Yeganeh M.

8. Role of nutrition impact symptoms in predicting nutritional status and clinical outcome in hemodialysis patients: a potential screening tool.
   Campbell KL, Bauer JD, Ikehiro A, Johnson DW.

   Li QW, Li GC, Wang YN, Long ZW, Liu XW, Zhang Z.

10. Changes in nutritional status, body composition, quality of life, and physical activity levels of cancer patients undergoing autologous peripheral blood stem cell transplantation.
    Hung YC, Bauer J, Horsley P, Waterhouse M, Bashford J, Isenring E.

11. What are the most effective methods for assessment of nutritional status in outpatients with gastric and colorectal cancer?
    Abe Vicente M, Barão K, Silva TD, Forones NM.

    Dias do Prado C, Alves Duarte Bonini Campos J.

13. The effects of patient participation-based dietary intervention on nutritional and functional status for patients with gastrectomy: a randomized controlled trial.

14. [Malnutrition in patients with cancer: four years experience].

15. Nutrition impact symptoms in advanced cancer patients: frequency and specific interventions, a case-control study.

18. [Predict factors associated with malnutrition from patient generated subjective global assessment (PG-SGA) in head and neck cancer patients].

21. The impact of chemotherapy-related nausea on patients' nutritional status, psychological distress and quality of life.

23. Markers of disease severity are associated with malnutrition in Parkinson's disease.

24. Use of an abridged scored Patient-Generated Subjective Global Assessment (abPG-SGA) as a nutritional screening tool for cancer patients in an outpatient setting.

26. Markers of disease severity are associated with malnutrition in Parkinson's disease.

2012

1. Effects of a new mixture of essential amino acids (Aminotrofic®) in malnourished haemodialysis patients.

2. A description of the nutritional status and quality of life of Australian gynaecological cancer patients over time.
Ryan M, White K, Roydhouse JK, Fethney J.
An exploratory study to clarify the cluster of symptoms predictive of chemotherapy-related nausea using random forest modeling.

Relationship between nutritional status, physical activity and quality of life among gastrointestinal cancer survivors.

Validation of the Malnutrition Universal Screening Tool (MUST) in cancer.

Nutritional intake and nutritional status by the type of hematopoietic stem cell transplantation.

A cross-cultural adaptation of the Portuguese version of the Patient-Generated Subjective Global Assessment.

Assessment of nutritional status of patients candidates for lung resection by 2 methods.

Baseline depression predicts malnutrition in head and neck cancer patients undergoing radiotherapy.

Adapted ice cream as a nutritional supplement in cancer patients: impact on quality of life and nutritional status.

Preoperative nutritional assessment and prognosis in patients with foregut tumors.

A clinical audit of the nutritional status and need for nutrition support amongst head and neck cancer patients treated with radiotherapy.

Nutritional assessment of cancer patients in Tehran, Iran.

The cachexia clinic: from staging to managing nutritional and functional problems in advanced cancer patients.

2011
1. Development and validation of a nutrition screening tool for hospitalized cancer patients.
   Kim JY, Wie GA, Cho YA, Kim SY, Kim SM, Son KH, Park SJ, Nam BH, Joung H.

2. [Research training in nutrition: relevance for medical clinical practice].
   Coronha AL, Lourenço C, Ferreira M, Reis N, Almeida R, Boleão-Tomé C, Monteiro-Grillo I, Camilo ME, Ravasco P.

3. [Efficacy evaluation of an oral powder supplement enriched with eicosapentaenoic acid in cancer patients].

   Phippen NT, Lowery WJ, Barnett JC, Hall LA, Landt C, Leath CA 3rd.

5. Comparison of PG-SGA, SGA and body-composition measurement in detecting malnutrition among newly diagnosed lung cancer patients in stage IIIB/IV and benign conditions.
   Li R, Wu J, Ma M, Pei J, Song Y, Zhang X, Han B.

   Mokori A, Kabehenda MK, Nabiyro C, Wamuyu MG.

7. Establishing a cancer nutrition rehabilitation program (CNRP) for ambulatory patients attending an Australian cancer center.
   Glare P, Jongs W, Zafiropoulos B.

   Chasen M, Hirschman SZ, Bhargava R.

9. Role of nutritional status in predicting the length of stay in cancer: a systematic review of the epidemiological literature.
   Gupta D, Vashi PG, Lammersfeld CA, Braun DP.

2010

1. [Nutritional status of patients with critical ischemia of the lower extremities].
   Claudia P, Amaral T, Dinis da Gama A.
   Rev Port Cir Cardiotorac Vasc. 2010 Oct-Dec;17(4):239-44. PMID: 22611545 Portuguese.

   Martin L, Watanabe S, Fainsinger R, Lau F, Ghosh S, Quan H, Atkins M, Fassbender K, Downing GM, Baracos V.

3. Nutritional status assessed by the Patient-Generated Subjective Global Assessment (PG-SGA) is associated with qualities of diet and life in Korean cerebral infarction patients.
2. Assessing the nutritional status of patients with sarcoma by using the scored patient-generated subjective global assessment.

5. [Assessment of a malnutrition screening tool in cancer patients].

8. Nutritional screening tools in daily clinical practice: the focus on cancer.

9. Body weight and fat-free mass changes in a cohort of patients receiving chemotherapy.

11. [Malnutrition in chronic kidney failure: what is the best diagnostic method to assess?].

12. Evolving classification systems for cancer cachexia: ready for clinical practice?

14. Objective and subjective nutritional assessment of patients with cancer in palliative care.

15. The diversity of nutritional status in cancer: new insights.

16. Nutritional status and information needs of medical oncology patients receiving treatment at an Australian public hospital.

2009

1. Quantifying the impact of standardized assessment and symptom management tools on symptoms associated with cancer-induced anorexia cachexia syndrome.

2. Nutritional risk factors in planned oncologic surgery: what clinical and biological parameters should be routinely used?

3. The relationship between subjective appetite sensations, markers of inflammation and appetite in dialysis patients.

2008

1. Audit of symptoms and prescribing in patients with the anorexia-cachexia syndrome.

2. Assessing the need for a dietitian in radiation oncology.

3. The impact of nutrition intervention on quality of life in pre-dialysis chronic kidney disease patients.

4. Comparison of different nutritional assessments and body-composition measurements in detecting malnutrition among gynecologic cancer patients.

5. [The nutritional status of patients with colorectal cancer undergoing chemotherapy].

6. Integration of prospective quality of life and nutritional assessment as routine components of multidisciplinary care of patients with head and neck cancer.

2007

1. Serum concentrations of TNF-alpha as a surrogate marker for malnutrition and worse quality of life in patients with gastric cancer.

2. Critical evaluation of nutrition screening tools recommended for oncology patients.

3. Nutritional status and length of stay in patients admitted to an Acute Assessment Unit.

5. Evaluation of nutrition assessment tools compared with body cell mass for the assessment of malnutrition in chronic kidney disease.
6. Consequences of radiotherapy on nutritional status, dietary intake, serum zinc and copper levels in patients with gastrointestinal tract and head and neck cancer.
Mahdavi R, Faramarzi E, Mohammad-Zadeh M, Ghaeammaghami J, Jabbari MV.

7. Symptoms and weight loss in patients with gastrointestinal and lung cancer at presentation.

2006
1. Validity of the malnutrition screening tool as an effective predictor of nutritional risk in oncology outpatients receiving chemotherapy.
Isenring E, Cross G, Daniels L, Kellett E, Koczwara B.

Barbosa-Silva MC, Barros AJ.

3. Usefulness of oral mucosal epithelial cell apoptosis rate in nutritional assessment.

4. Evaluation of nutritional and inflammatory status of advanced colorectal cancer patients and its correlation with survival.
Read JA, Choy ST, Beale PJ, Clarke SJ.

2005
1. Malnutrition determined by the patient-generated subjective global assessment is associated with poor outcomes in acute stroke patients.
Martineau J, Bauer JD, Isenring E, Cohen S.

2. An epidemiological evaluation of the prevalence of malnutrition in Spanish patients with locally advanced or metastatic cancer.

3. Poor nutritional status prior to peripheral blood stem cell transplantation is associated with increased length of hospital stay.
Horsley P, Bauer J, Gallagher B.

4. Assessment of nutritional status in hemodialysis patients using patient-generated subjective global assessment.
Desbrow B, Bauer J, Blum C, Kandasamy A, McDonald A, Montgomery K.

5. Nutritional assessment in cancer: comparing the Mini-Nutritional Assessment (MNA) with the scored Patient-Generated Subjective Global Assessment (PGSGA).
Read JA, Crockett N, Volker DH, MacLennan P, Choy ST, Beale P, Clarke SJ.

Bauer JD, Capra S.

2003
1. A chart review, pilot study of two single-item screens to detect cancer patients at risk for cachexia.
Kirsh KL, Dugan C, Theobald DE, Passik SD.
Palliat Support Care. 2003 Dec;1(4):331-5. PMID: 16594222

2. Use of a supportive care team for screening and preemptive intervention among multiple myeloma patients receiving stem cell transplantation.

3. The scored Patient-generated Subjective Global Assessment (PG-SGA) and its association with quality of life in ambulatory patients receiving radiotherapy.

2002
1. Use of the scored Patient-Generated Subjective Global Assessment (PG-SGA) as a nutrition assessment tool in patients with cancer.

2001

2000
1. Bidirectional interplay of nutrition and chemotherapy.

1999
1. [Good clinical practice in nutritional management in cancer patients: malnutrition and nutritional assessment].

1998
1. Integrating proactive nutritional assessment in clinical practices to prevent complications and cost.

1996
1. Definition of standardized nutritional assessment and interventional pathways in oncology.

2. Supportive nutritional management of the patient with pancreatic cancer.

1994
1. Rethinking nutritional support of the cancer patient: the new field of nutritional oncology.

2. Cancer cachexia: prevention, early diagnosis, and management.
